DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, lines 8-9 recites "a hardware like manner." The specification discloses "a hardware manner" (page 6, line 1). It is not clear what features would constitute "like" hardware. The examiner assumes that "hardware" is used to distinguish from "software," but it is not clear whether "hardware" and "hardware like" is intended to convey the same limitation or different limitations.

Claim 6, line 10 recites "a hardware like manner."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being clearly anticipate by Kim (US 6,594,778 B1).

Kim teaches the duplexing method in a system duplexed into a first unit and a second unit (Figure 3) including a duplexing channel (Duplexing Bus), duplexing control logic section

(Logic Units 33, 34, 43,44) and the active processor (CPU 31). Kim concurrently accesses the first local memory (Memory 32) and second local memory (Memory 42) using the logic units based on a request by an active processor (Column 2, lines 44-59, "Concurrent Writing Operation").

Allowable Subject Matter

5. Claims 3 and 4 are allowed.
6. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Claims 2 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
